## EXPERIENCES

---

### Mobile Front-End Developer

MooManage

January 2025 – Present

Davao, Philippines

- Developed functional front-end components using **React Native** to enhance user experience and application performance.
- Enhanced state management, responsiveness, and design details using **TypeScript**, **Nativewind**, & **React Hooks**.
- Collaborated with the team using **Git** with proper branching & commit conventions.

## PROJECTS

---

### Rentals & Event Booking Ecommerce for Party Business – UI/UX, Front-End

March 2025

- Led the product design and UI/UX of the system's website using **Figma** on both the storefront and owner side.
- Led the front-end development of the website using **Next.JS** and **Tailwind** and implemented its state-management, responsiveness, and client-side optimizations.
- Implemented robust features from the **Next.JS** using Dynamic Routing, Lazy Loading, and components
- Collaborated with the team using **Git** to resolve and debug code written with **React** and **TypeScript**.

### Errand Delegation App for Schools – UI/UX

January 2025

- Led the creation of the app's prototype, brand identity, and the app's wireframe screens using **Figma**.
- Implemented prototyping under Figma's features where it allows interactivity to gauge the overall user experience of the design.

### UM Enigma Student Organization Website – Front-End Developer

October 2024

- Contributed to the organization's official website and implemented its design, components and animations using **React**, **Vite**, **Motion**, and **Tailwind**.
- Collaborated with the team using **Git** to resolve and debug code written with **React** and **JavaScript**.

## EDUCATION

---
